

UXD20PE is an evaluation board for UXD20P. This very compact board is extremely versatile to fit into the most confined lab environment.

Application Notes :

1. If RF inputs/outputs are used in single-ended configuration, terminate unused inputs/outputs with 50 ohm loads.
2. Use on-board switches to control the divide ratios

Switch Settings		Division Ratio Output
A	B	
0	0	1
1	0	1/8
0	1	1/4
1	1	1/2

3. Refer to UXD20P datasheet for performance specifications.
